1.0 Introduction

1.1 Purpose and Scope

The District of Columbia (“the District”) Government through the District Department of Human Services (DHS) implements the District Heat Emergency Plan when a Heat Emergency occurs and the National Weather Service (NWS) issues an “extreme heat warning” for the District. The Heat Emergency Plan provides information on the District operations to aid all residents, particularly vulnerable populations with health issues, the homeless, and visitors to the city.

On days when the “heat index,” a measurement of the air temperature in relation to the relative humidity, used as an indicator of the perceived temperature, or temperature reaches 95, the District Government will activate Cooling Centers. The Cooling Centers will be activated in publically accessible government facilities, homeless shelters, and senior citizen wellness centers, and will be open until 6:00 p.m., or until a time specified by the individual facilities. The Homeland Security and Emergency Management Agency (HSEMA), in conjunction with the District Department of Health (DC Health) and DHS, will also disseminate emergency public information to the public through the District’s heat webpage, heat.dc.gov, or the District’s webpage at www.dc.gov.

The following key applies to the list of facilities within this document:

Facilities Available for Use
Facilities Off-line/Not Available
Temporary/Surge Facilities – Available for Use

1.2 Illegal Use of Fire Hydrants

The Executive Office of the Mayor strictly prohibits the activation or opening of fire hydrants anywhere in the District for the purpose of street showering without prior consent from the Mayor, City Administrator, or Deputy Mayor for Public Safety and Justice. Unauthorized use of a fire hydrant can hamper firefighting capabilities and tampering with a fire hydrant can cause personal injury, damage to the hydrant or hydrant nozzle, and damage to the underground pipe lines in the water distribution system.
